👤 Profile

Hello! I'm a Front-End Developer with practical skills in interface development, gained through learning and working on personal and commercial projects. I have experience with **HTML, CSS, JavaScript, responsive design, and tools like Git and Gulp**. I'm looking for an opportunity to apply my knowledge and develop my skills with modern frameworks and technologies. I'm motivated to learn and work in a team to create innovative and efficient products.

💼 Work Experience

Frontend Developer

UpWork

october 2024 – present

- Interface development based on Figma: fully adhering to client specifications and requirements.
- Hosting setup: configuring and deploying the site to ensure availability.
- Integration of WayForPay and SendPulse: handling payment processing and automated messaging.
- Device testing: ensuring responsiveness and proper functionality across all device types.
- GitHub Pages: showcasing projects to clients.

Frontend Developer
